

## Mark Sanborn AV needs

1. Wireless Lavalier microphone for audiences over 50 people.
2. Standard data projector for use with Apple's *Keynote '09* presentation software. Speaker provides his own converter (aka "dongle") for the projector.
3. Connect to the house sound system via the computer's headphone jack.

Speaker uses a MacBook Pro computer that utilizes Apple's *Keynote* presentation software. All slides are created in this software and are inoperable on a PC.

Speaker will advance the slides on his own, no indicator light functions are permissible.

Audio and Videotaping is prohibited without written permission from Sanborn & Associates.
